Questions & Answers – Addendum 1

IT Management Corporation Questions

1. Is the district open to consider an alternate of the Meraki MR52? This would be capable of additional 600mb of throughput and 4x4 radios vs the MR42 at 3x3.

Yes, the district is open to consider an alternate of the Meraki MR52 capable of an additional 600mb of throughput and 4x4 radios vs the MR42 at 3x3.

2. Is the district open to consider an alternate of the MR84 for the outdoor access point? The MR84 has 2.5Gbs 4x4 radios vs the MR72 1.2Gbs 2x2.

Yes, the district is open to consider an alternate of the MR84 for the outdoor access point to support 2.5Gbs and has 4x4 radios

3. Is the Hollister School District seeking bids to include the cabling installation services?

No, the cabling installation services are not a part of this particular RFP

AMS.net Questions

1. I would like to know if installation services are required for your RFP?

No installation services are required for our RFP

2. I notice cabling materials but cannot confirm if there is installation needed.

The installation is not a part of this particular RFP

3. I would also like to know if you need a core switch for the sites you have listed?

We are not in need of a core switch other than the hardware specified on the RFP
